ESLAM MAHMOUD

MOBILE DEVELOPER | FLUTTER & REACT NATIVE SPECIALIST

Mansoura, Egypt | xdev.eslam@gmail.com | +20 1122299831 | GitHub | Portfolio

PROFESSIONAL SUMMARY

Results-driven Mobile Developer with a Mechatronics Engineering background, specialized in architecting high-performance cross-platform applications using **Flutter** and **React Native**. Proven track record of delivering published production-grade apps on the App Store and Google Play. Expert in **Clean Architecture**, reactive state management, and modern CI/CD workflows. Leverages AI-augmented development to accelerate feature delivery while maintaining high code quality and scalability.

WORK EXPERIENCE

Mobile Development Intern — Feb 2026 – Present

Nile University (Sponsored by Banque Misr) — Cairo, Egypt

- Architecting cross-platform mobile solutions using React Native and Flutter with a focus on scalable, maintainable design patterns.
- Utilizing AI-assisted development workflows to optimize feature planning, automated documentation, and debugging efficiency.
- Collaborating in Agile sprints to implement state-driven features and intuitive user interfaces for financial technology prototypes.

Junior Flutter Developer — Sept 2025 – Jan 2026

H Solution — Cairo, Egypt

- **Key Achievement:** Developed and successfully deployed 2 commercial applications (**Maysur** and **Free Zone**) to the App Store and Google Play within tight delivery timelines.
- Engineered robust app architectures using **Clean Architecture** and **BLoC/Provider**, achieving high separation of concerns and testability.
- Integrated real-time Firebase services and complex REST APIs, implementing efficient data-caching strategies for offline resilience.
- Optimized application performance, achieving sub-2s initial load times and smooth 60fps animations.

MILITARY SERVICE COMPLETED (RESERVE OFFICER)

Quality Control & Production Supervisor — Oct 2022 – Oct 2024

Armed Forces Plastic Factory — Cairo, Egypt

- Led cross-functional technical teams of 10+, overseeing production lines and maintaining a 95%+ safety compliance record.
- Managed technical maintenance on PLC and CNC systems, reducing operational downtime by 10% and material waste by 15% through optimization.

FEATURED PROJECTS

Maysur (E-Commerce Platform) — Flutter, REST API, BLoC, Google Maps — Google Play | App Store

- Developed a production-grade multi-vendor e-commerce application published on Google Play.
- Integrated complex REST APIs and real-time location services for seamless vendor discovery.

Free Zone (Hyper-Local Marketplace) — Flutter, Google Maps SDK, Geolocation — Google Play | App Store

- Successfully launched a hyper-local marketplace on the App Store with precision geolocation services.
- Integrated interactive mapping features and real-time vendor discovery to enhance user experience.

FEATURED PROJECTS (CONT.)

NovaStore (E-Commerce Ecosystem) Flutter, Firebase, BLoC, Clean Architecture **View Source**

- Engineered a complete e-commerce solution with a bespoke Material 3 design system and repository-pattern-based architecture.
- Implemented full Firebase backend integration including authentication, real-time database, and cloud messaging.

TECHNICAL SKILLS

Core Mobile: Flutter (Dart), React Native (JavaScript, TypeScript), iOS & Android Deployment

Architecture & State Management: Clean Architecture, SOLID Principles, BLoC, Provider, Redux, Context API, MVVM

Backend & Infrastructure: Firebase (Authentication, Firestore, Cloud Storage), RESTful APIs, GitHub Actions, CI/CD

Tools & AI: AI-Augmented Development, Prompt Engineering, Figma, Git, GitHub, App Store Connect, Google Play Console

ADDITIONAL PROJECTS

BeatFlow (Advanced Audio Streaming) React Native, Expo, Context API, Deezer API

- Developed high-performance audio player with native background playback integration and lock-screen media controls.
- Engineered resilient networking layer with automatic polling and offline synchronization capabilities.

DevSync (SaaS Management Platform) Flutter, Firebase, BLoC, SaaS Architecture

- Developed a multi-tenant SaaS workspace for project management with interactive data visualization and real-time synchronization.
- Implemented dynamic Kanban boards and multi-level user permissions using Firestore security rules.

GlobalFood (Food Delivery Ecosystem) React Native, Expo, Redux, Firebase **View Source**

- Engineered a high-performance food delivery app with real-time order tracking and complex state management using Redux.
- Integrated secure payment processing and geolocation-based restaurant discovery.

EDUCATION

Bachelor of Science in Mechatronics Engineering **2017 – 2022**

Mansoura University — Mansoura, Egypt

Highlight: *1st Place, Mansoura University Robotics Challenge — Recognized for excellence in logic systems.*
