

Eslam Mahmoud

Junior Mobile Developer - Flutter & React Native

Mansoura, Egypt | Open to Remote / Hybrid Roles
xdev.eslam@gmail.com | +20 1122 299 831 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Mobile Developer with a solid Mechatronics Engineering background and professional certifications from Meta and Google. Expert in building high-performance cross-platform applications using Flutter and React Native, with production experience shipping 5 apps to global stores and delivering 13+ architectural projects. Specialized in Clean Architecture, BLoC/Provider state management, Firebase, and robust API integrations. Military service completed; available for full-time or contract mobile engineering roles.

TECHNICAL SKILLS

Mobile Frameworks:	Flutter (Dart), React Native (TypeScript/JavaScript), Expo
Architecture:	Clean Architecture, SOLID Principles, BLoC, Provider, Redux, Context API, MVVM
Backend & APIs:	Firebase (Auth, Firestore, Storage, FCM), RESTful APIs, Dio, Axios
Release & Tools:	Git, GitHub, GitHub Actions, App Store Connect, Google Play Console, Docker
Quality:	Unit Testing, Widget Testing, Debugging, Performance Profiling, QA Mindset
Design & Other:	Figma, Google Maps SDK, Material Design 3, Mobile UI Implementation, AI-Assisted Development, Gemini AI Integration

WORK EXPERIENCE

Mobile Development Intern

Feb 2026 – Present

Nile University — Sponsored by Banque Misr, Cairo, Egypt

- Building cross-platform mobile prototypes in React Native and Flutter with maintainable component structure, state-driven UI patterns, Agile collaboration, and AI-assisted debugging/documentation.

Junior Flutter Developer

Sep 2025 – Jan 2026

H Solution — Cairo, Egypt

- Launched **2 production Flutter apps** (Maysur e-commerce, Free Zone marketplace) on Google Play and App Store using Clean Architecture + BLoC.
- Built **8+ screens per app** including product catalog, cart, checkout flows, and vendor discovery with Google Maps SDK.
- Integrated **Firebase Auth, Firestore, and REST APIs** with structured error handling, reducing API failure UX issues by 40%.
- Implemented state management with **BLoC and Provider**, achieving sub-2-second cold start times on mid-range devices.

Quality Control & Production Supervisor

Oct 2022 – Oct 2024

Armed Forces Plastic Factory — Cairo, Egypt

Led **10+ personnel** across production and quality-control work; managed PLC/CNC maintenance while reducing downtime by **10%** and material waste by **15%**.

LEADERSHIP

- Reserve Officer** — led 10-person production team, reduced material waste **15%**.

PROJECTS

Selected Work

Tazeeq — Premium Shopping App & AI Assistant | React Native, Gemini AI, Redux, Expo

[GitHub](#)

- Built a React Native grocery app prototype with a polished shopping UI, **Gemini AI** catalog assistant, Redux state management, and full RTL/Arabic localization.

Maysur — E-Commerce Platform | Flutter, BLoC, REST APIs, Google Maps

[Play Store](#) | [App Store](#)

- Built production e-commerce flows for product discovery, cart behavior, transaction states, and payment integration using Clean Architecture with BLoC.

Free Zone — Hyper-Local Marketplace | Flutter, Provider, Google Maps SDK

[Play Store](#) | [App Store](#)

- Launched a geolocation-aware marketplace connecting service providers and consumers with Google Maps-based vendor discovery.

NovaStore — E-Commerce Ecosystem (Open Source) | Flutter, Firebase, BLoC, Clean Architecture

[GitHub](#)

- Built an open-source e-commerce foundation with Material 3 UI, Firebase Auth, Firestore, FCM, and Dartz Either failure handling.

EDUCATION

B.Sc. Mechatronics Engineering

2017 – 2022

Mansoura University — Mansoura, Egypt

1st Place - Mansoura University Robotics Challenge

CERTIFICATIONS

Google AI Professional - Google / Coursera, 2026 (7-course series)	Verify
Flutter & Dart - Complete App Development Specialization - Packt / Coursera, 2026	Verify
